Hi, I'm Julien. I'm into building elegant and engaging web apps that help solve meaningful issues.

Experience

2017 - Present

Lead Front-End Developer
Healthy.io

2015 - 2017

Full Stack Developer
monday.com

- Developed a few of monday.com's largest features, including its account admin, team management system, and the Gantt-like Timeline.
- Helped oversee the dev team's transition to React.
- Rebuilt from scratch monday.com's homepage using a static site generator and placing emphasis on performance, responsiveness, modularity, and SEO.
- Crafted with precision HTML emails that are read daily by tens of thousands of users.

2012 - 2015

Full Stack Developer
Signals Analytics

- Design and development of a BI-reporting tool and additional client-facing web apps (BE in PHP, FE using React or Angular).
- Development of interactive data visualizations for Fortune 500 clients.
- Technical adviser on new projects, defining methods for data collection, transformation, and analysis.

2011 - 2012

Full Stack Developer
Waste To Watts

- Development of a platform to store and display data in real-time about the health of the power grid in India.
